Siphon Networks is now ISO27001 certified

2013-11-22 - Aled Treharne - [0 Comments](#) - in [General Announcements](#)

Following a final audit this week, Siphon is now ISO27001 certified. The team behind many of the systems have been particularly gratified to learn that very few changes were required in order to comply as the systems we have built over the past 4 years have all been designed and put together with security in mind.

If you need more information about Siphon, how we work and standards compliance, please let us know. You can also click on the logo below to verify our registration.
